# CHEESE *the* QUEEN

PURE PROBIOTIC  
IN GOURMET FORM

Once upon a time (not so far away) a mysterious lady of royal blood was born: Cheese the Queen. From her very first breath, she knew her purpose: To reimagine the way the world enjoys cheese.

Why it is so darn awesome?

Welcome to the foodie revolution: Gourmet artisanal tree nut cheese! We wish to give the world a (delicious) slice of plant-based goodness, promoting great taste and even better health.

Behind our dream, there is a sustainable know-how developed in our factory. We still use authentic production methods and hand-make everything, however, our laboratory equipment provides all-important security and reassurance in knowing that everything is fully tested, naturally matured, and loaded with millions of *Lactobacillus Acidophilus* – delivering flavor explosions and encouraging superior health. Seeing as our cheese is aging naturally, it only become stronger, healthier and tastier with time.

Take a bite of Cheese the Queen, and you are guaranteed top cheese made with love, passion and care. Delight your senses and celebrate healthy food with your friends and family.

Long live the Queen!

## PRODUCTS

The Queen's cheeses  
Wouldn't life be boring if we were in the same mood day after day? The Queen agrees. Her feelings are always fluctuating, and with every new day, she has a new story to tell. Regardless, each of her creations is made with the utmost love, passion and care. Three moods. One result: Fabulous flavor fusions!

When the sun rises at dawn, the Queen is fabulously fermented, rich and full of flavor. She is the epitome of a mouth-watering cheese. In her kingdom, lactose is banished; as is gluten and soy. She hates the bad stuff. Only the good stuff. All hail the Queen!

**Classic:**
